

## Interlock Entry

Prevent Unauthorized Occupants from Entering with an Unattended Solution

We provide multiple options for preventing entry into a location until an occupant successfully completes a Health Check Survey and successfully complete a Fever Check. Here are a few options:

1. Electrically Control existing Turnstiles, Gates, or Doors
2. Integrate with Building Access Software to Control Badges
3. Install and Electrically Control Turnstile

We are flexible and can customize a unique solution that works best for your location. We have partnership with [Hayword Turnstiles, Inc.](#) to provide a variety mechanical interlocking solutions if no applicable turnstiles, gates, or doors are currently installed.
